## About Me

Electrical Engineering graduate, awaiting graduation with a focus on Web Development and experience developing web applications from frontend development to backend and database integration. Familiar with HTML, CSS, JavaScript, React.js, Next.js, Node.js, Django, Firebase, MySQL, and Supabase for developing reservation systems, Learning Management Systems, secure cloud storage, and IoT-based applications. Experienced in building responsive interfaces, user authentication, data management, debugging, troubleshooting, and web feature testing.

## Skills

- HTML, CSS, JavaScript, Python
- React.js, Next.js
- Node.js, Express.js, Flask
- Firebase, MySQL, Supabase
- REST API Integration
- Debugging & Troubleshooting

## Tools

- Git & GitHub
- Google Colab
- VS Code
- Arduino IDE
- Figma
- Microsoft Office

## Language

Indonesian – Fluent

English – Basic

## Experience

### Website Reservation & Ticketing System – GOR Jayabaya

2025

Vanilla JavaScript, Firebase, AES-256

Developed a web-based facility reservation and ticket purchasing system with schedule management, user and admin features, automatic cost calculation, and invoice generation. Implemented AES-256 encryption to protect user identity data before storage and decryption when the data was used by the system. Developed an admin dashboard for managing content, schedules, and booking data.

### Website Learning Management System (LMS)

2025–2026

Vanilla JavaScript, Firebase, Supabase

Developed a web-based Learning Management System to support student learning activities, including learning materials, quizzes, assignments, and activity tracking. Implemented Admin and Student roles and developed a responsive and user-friendly interface.

### Website IoT for Irrigation & Fertilization

2024

ESP32, JavaScript, Firebase Realtime Database

Developed an ESP32-based greenhouse irrigation system with manual and automatic control through a web interface. Implemented scheduling features that allow users to set the day and time for the AC water pump to turn on and off automatically. Integrated the website with the IoT device using Firebase Realtime Database for data exchange and control commands.

### Website Secure Cloud Storage

2026

Django, Supabase, ChaCha20-Poly1305, TOTP

Developed a cloud storage website using Django with Supabase as the database and storage platform. Implemented client-side encryption using ChaCha20-Poly1305 to store files in encrypted form and TOTP as two-factor authentication for user access.

## Education

### Bachelor of Electrical Engineering

2022–2026

Universitas Islam Kadiri

Completed undergraduate studies in Electrical Engineering with a concentration in Industrial Electronics, achieving a GPA of 3.75/4.00. Developed competencies in programming, IoT-based systems, industrial electronics, and web application development.
